- Version control of project.

# PERSONAL PROJECTS

WEB DEVELOPMENT

## 2025

### Roomily

- <https://roomily.vercel.app>
- Roomily is a modern roommate matching platform built with React and Firebase. It connects students and young professionals through real-time messaging, smart listing management, and location-based search. Features include secure authentication, comprehensive user profiles, admin moderation tools, and a mobile-responsive design with dark mode support.

## 2025

### Present Perfect

- <https://presentperfect.vercel.app>
- Present Perfect is an AI-powered gift recommendation web app built with Next.js 15, React 19, and Google's Generative AI. Users complete a personality quiz about the gift recipient (age, interests, relationship, occasion), and the app generates personalized, thoughtful gift suggestions. Features include Firebase authentication, saved gift collections, recipient profiles, theme customization by occasion, and greeting card message generation. Built with TypeScript, Tailwind CSS, and Radix UI components.

## 2025

### FinTrackX

- <https://fintrack-x-theta.vercel.app>
- FinTrackX is a Next.js-based personal finance tracker enabling users to manage multiple bank accounts, track income/expenses with categories, and analyze spending through interactive reports. Built with React 19, Firebase, and Tailwind CSS, it offers real-time synchronization, CSV exports, and secure authentication for comprehensive financial management across devices.
